

## **Summary Bio Information- M. Saiid Saiidi, 11/2019**

Dr. Saiidi is a professor of Civil and Environmental Engineering and Director of Center for Advanced Technology in Bridges and Infrastructure at the University of Nevada, Reno. He is also a research faculty at the University of California, Los Angeles (UCLA), and a principal at Infrastructure Innovation, LLC, Reno, Nevada. He has published over 500 papers and reports and given over 400 presentations, many as a keynote speaker in over 30 countries. Professor Saiidi's research has been funded by the US National Science Foundation, Federal Highway Administration, US Department of Transportation, the National Cooperative Highway Research Program, the California, Nevada, and Washington Departments of Transportation, and industries. Professor Saiidi's primary research focus has been on experimental and analytical studies of seismic response of reinforced concrete bridges, seismic retrofit, resiliency with novel materials, seismic response and design of precast bridges, and probabilistic design for seismic damage control. He has received many awards for his research including the Outstanding Researcher Award, Established Innovator Award, University of Illinois at Urbana-Champaign Distinguished Alumni Award among others. He is a registered engineer in California and Nevada, and a member of the Mexican National Academy of Engineering.
